that time.

Description:

Child Centric Disaster Risk Reduction (CCDRR) - South Campus, Vijayawada, Andhra Pradesh, Centre of National Institute of Disaster Management (NIDM), Ministry of Home Affairs, Government of India & Department of Civil Engineering, Invertis University, Bareilly (Uttar Pradesh) are jointly organizing webinar on "Developing Resilient Educational Infrastructure for Children, National Institute of Disaster Management (NIDM), Ministry of Home Affairs, Government of India, is a premium institute and a Statutory Body/under Disaster Management Act 2005) for training, research, documentation, awareness and human resources and capacity development in the field of disaster mitigation and management.

Educational infrastructure in most countries around the world is underfunded and overextended, and schools are more vulnerable to natural hazards than other building types. It is not only putting children at significant risk, but also reducing the quality of education and limiting opportunities for economic and social growth and other community benefits. In addition, in the wake of natural disasters, despite best intentions to 'build back better', the opportunity to leverage investment in the reconstruction of educational institutions has in some cases been lost due to lack of advance preparation and capacity for recovery and reconstruction.

The objective of holding this webinar is to disseminate information about enhancing the capacity of different stakeholders to build back better and provide a resilient and safe environment to students & also create awareness in the society about resilient educational infrastructure.

After successful completion of the programme & submitting the feedback form participants will be provided with authorized e-certificates from NIDM & INVERTIS University.

Seeking your valuable presence kindly spare a little time from your busy schedule and grace the event.

In case of any difficulty in the process, kindly contact me.

With kind regards,

Registrar
