

Press Note

Name of Event: Modern Farming Education Campaign

Date: 23/04/2021

Date: 23/04/2021

In an era where the agricultural landscape is rapidly evolving, this campaign seeks to empower farmers with cutting-edge knowledge, modern techniques, and sustainable practices to boost productivity and ensure a resilient future for agriculture. Invertis University organized The modern farming education campaign - The primary goal of this campaign is to equip farmers with the latest advancements in agriculture, fostering sustainability, increased yields, and improved livelihoods. It aims to bridge the gap between traditional methods and modern, efficient practices while promoting a mindset of continuous learning and adaptation.

Our vision is not merely a successful campaign but the creation of a sustainable network of empowered farmers, capable of adapting to new challenges and leading the way in modern, progressive agriculture.
