

Name of the Cell/Department: The I-Tech –The Technical Club

Academic year: 2019-2020

Name of the program: Personality Development Workshop

Date: 05 -11-2019

Venue: Seminar Hall 1

Description:

The I-Tech – The Technical Club at Invertis University organized a transformative Personality Development Workshop on November 5, 2019. Aimed at engineering students, particularly those in their final year seeking placement opportunities, the program was held at Seminar Hall 1, marking an essential step in preparing students for their professional journey.

The workshop's primary objective was to equip participants with the necessary skills and attributes essential for personal and professional growth. The day-long event delved into various aspects integral to enhancing one's personality, focusing on communication skills, confidence-building exercises, body language comprehension, and interview etiquette.

Expert speakers, comprising seasoned professionals from diverse industries, shared their insights and experiences, offering invaluable guidance to the eager participants. Their sessions covered a wide array of topics, ranging from effective communication techniques to the nuances of body language, instilling confidence and refining interpersonal skills.

The interactive nature of the workshop encouraged active participation, fostering an engaging learning environment. Participants engaged in role-playing exercises, mock interviews, and group discussions, providing them with hands-on experience and a platform to hone their abilities.

Feedback collected from attendees reflected a positive impact on their outlook and approach towards personal development. Many expressed gratitude for the practical advice and tools provided, acknowledging the workshop's role in bolstering their confidence and readiness for the upcoming placement season.

The workshop's success can be attributed to the collaborative efforts of The I-Tech – The Technical Club, Invertis University faculty, and the esteemed guest speakers. Their dedication and commitment to nurturing the students' potential were evident throughout the event, ensuring its effectiveness and value.

In conclusion, the Personality Development Workshop organized by The I-Tech – The Technical Club during the 2019-2020 academic year served as a pivotal platform for empowering engineering students. It not only equipped them with essential skills but also instilled a sense of self-assurance, preparing them to confidently face the challenges of the professional world ahead.
