Press Note

Name of the Program: Workshop on
"Technology-Enabled Teaching and Learning"

Date: 14th October, 2019

The Department of Computer Science & Engineering at Invertis University hosted an insightful workshop on "Technology-Enabled Teaching and Learning" on the 14th of October, 2019. The workshop aimed to explore innovative ways of integrating technology into the education process and was attended by faculty members, students, and education enthusiasts from diverse fields. The workshop commenced with a warm welcome extended to all attendees by the organizing committee. The Dean of the Department of Computer Science & Engineering, along with faculty members, expressed their gratitude for the participants' presence and enthusiasm. Dr. Suhail Javed Quraishi then took the stage and delivered an engaging and insightful session. He began by discussing the evolving landscape of education in the digital era, emphasizing the importance of adapting teaching methods to align with the expectations and preferences of today's tech-savvy students.
