"MEDIA LITERACY AND COMMUNICATION FOR SOCIAL DEVELOPMENT"

About the Invertis University

Invertis University is situated in Bareilly on NH-24, equidistant from the country's capital, Delhi and State's capital Lucknow. From a humble beginning in 1998, Invertis has come a long way. From 83 students and one Institute-Invertis Institute of Management Studies, today we stand tall as a full fledged University with 10 different institutes under its name. We offer a range of Doctoral, Post Graduate & Under Graduate programs in Management, Computer Applications, Engineering, Agriculture, Law, Commerce, Pharmacy, Journalism & Mass Communication, Fashion Design, Education and Applied Science & Humanities. At Invertis, we believe that the success of a teacher comes along with the achievements of a student. To ensure our students succeed we make sure they get the very best, that's why our faculty comes from premier institutes like IIT's, IIM's & NIT's. Invertis pioneered the concept of holistic development, an approach of more than just text book studying and an all-round approach of learning. It stems from the old management concept of "Keep your feet warm, back straight and head cool".

About the Conference

India, being a developing country, lacks media literacy and therefore lacks the ability to think critically on various subjects. As a matter of fact, media literacy is one of the contributing factors responsible for countless forwards of unidentified messages and null media that lead to the spread of mis information and violence. A picture, and the manner in which it is introduced, can be used and impact the viewer to take a specific decision on an issue. Given the innovative advancements in the previous few years, we are barraged by pictures, reviews, and recordings that look to influence us in a specific perspective. Hence, we as the perusers or watchers need to see the media intelligently, with the objective to discover or break down what is being introduced. Thereby to be media literate is critical to be able to decipher and dissect media data. If an individual can't understand difference between what is valid and false, they will have a considerably more trouble some time exploring media adequately. Thus there is a need for media literacy in order to develop society by creating awareness about the right information. Various media platforms are disseminating numerous type of content through their individual channels, altogether they are transforming the basic understanding of the entire populace. India being an abode for more than a billion lives is swiftly getting educated in a different sense now, knowingly or unknowingly as vigilant civilians of this democratic republic need to calculate its paradigm and beyond about it. Therefore the conference will aim at the need to make mindfulness among the individuals about the information on right media use to grow socially. Furthermore, a conclusive job is played by communication in social development in the present new atmosphere of social change. As the world moves towards more noteworthy majority rule, government, decentralization and the market economy, conditions are getting more ideal for individuals to begin directing their own course of progress. However, it is fundamental to animate their mindfulness, interest and abilities. Relational abilities and innovation are fundamental to this errand, however at present are frequently under utilized. Strategies are required that support successful arranging and execution of communication programs for development. To spread media proficiency, we need to oblige the requirement for communication to forward the knowledge sufficiently and instruct the majority related to it. Therefore through this international conference our objective is to address different aspects of media literacy and communication and their relative importance in social

Department of Agriculture

Academic Audit Report for Session: 2020-21

Departmental Goals (min. five points)

1. To impart advanced scientific and technical knowledge to the students in Agriculture and Food Science domain.
2. To enhance the capability by hands on experience through practical and field work apart from the theoretical knowledge.
3. Developing capability to contribute in modern farming and technologies to meet the need of future.
4. To prepare skilled manpower in agriculture and food processing sector.
5. To develop application of scientific methods of analysis to problem solving skills to contribute and ensure the food security of the nation.
6. To prepare the students to contribute in modern agriculture, farming and post-harvest processing.
