

<b>B.Sc. Biotechnology: Semester-II</b> <b>BST 202 Microbiology</b>	
<b>Teaching Scheme</b> Lectures: 3 hrs/Week Tutorials: 1 hr/Week  Credits: 4	<b>Examination Scheme</b> Class Test - 12 Marks Teachers Assessment - 6 Marks Attendance - 12 Marks End Semester Exam - 70 marks

**Prerequisite:** - General knowledge of Microbiology of intermediate level.

**Course Objectives:**

1. To give an overview of Classification of Microorganisms, Role of Microorganisms in Disease, Study of Microbial Structure
2. To give basic knowledge of Prokaryotic & Eucaryotic Cell: Structure Size, Shape and Function
3. To have an overview of Microbial Nutrition and Microbial Growth
4. To explain about the different Types of Media, Isolation of Pure Cultures, Growth Curve, measurement of Microbial Growth, Cell Numbers & Cell Mass.
5. To explain the General Characteristics, Cultivation & Purification, Structure of Viruses
6. To explain about the different types of Antimicrobial Agents, Antibacterial Drugs, Antifungal Drugs, Antiviral Drugs, Drug Resistance

**Course Outcomes:**

After completing the course, students will be able to:

- CO1: Understand various applications of microbes in our day to day life
- CO2: Study and isolate the different types of microbes on the basis of staining techniques
- CO3: Identify different types of growth media and factors affecting growth of microbes
- CO4: Control of Microorganisms by Physical and Chemical Agents
- CO5: Drug Resistance and the Mechanisms of Drug Resistance

**Detailed Syllabus:**

**UNIT-1 History and Scope of Microbiology**

History and Scope of Microbiology, Classification of Microorganisms, Role of Microorganisms in Disease, Study of Microbial Structure (Microscopy), Prokaryotic & Eucaryotic Cell: Structure Size, Shape and Function, Prokaryotic Cell Wall, Peptidoglycan Structure, Gram-Positive Cell Walls, Gram-Negative Cell Walls, Mechanism of Gram Staining, Capsules, Slime Layers, and S-Layers, Pili and Fimbriae, Flagella and Motility, Chemotaxis, Bacterial Endospore

**UNIT-2 Microbial Nutrition and Microbial Growth**

  
Head

Department of Biotechnology,  
Invertis University, Bareilly (U.P.)

  
Dean  
Faculty of Science  
Invertis University, Bareilly (U.P.)

  
Registrar  
Invertis University,  
Bareilly

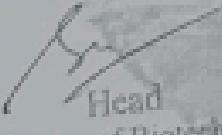

Microbial Nutrition and Microbial Growth: Nutrient Requirements (C, H, O, N, P, S), Nutritional Types of Microorganisms, Growth Factors, Uptake of Nutrients by the Cell, Group Translocation, Iron Uptake, Types of Media, Isolation of Pure Cultures, Growth Curve, Measurement of Microbial Growth, Cell Numbers & Cell Mass, Chemostat & Turbidostat, Sterilization, Control of Microorganisms by Physical and Chemical Agents, Antimicrobial Agent Activity & Evaluation, Bacterial Recombination: General Principles, Bacterial Plasmids, DNA Transformation, Transduction, Recombination and Conjugation.

**UNIT-3 Viruses**

Viruses: Introduction, General Characteristics, Cultivation & Purification, Structure of Viruses, Virion Size, Structural Properties, Helical Capsids, Icosahedral Capsids, Principles of Virus Taxonomy, Antimicrobial Drugs, Dilution Susceptibility Tests, Disk Diffusion Tests, MIC, Mechanisms of Action of Antimicrobial Agents, Antibacterial Drugs, Antifungal Drugs, Antiviral Drugs, Drug Resistance, Mechanisms of Drug Resistance, Clinical Microbiology, Microbiology of Food, Industrial Microbiology and Biotechnology

**Text and Reference Books**

1. Powar C. B. and H. F. Dagnawala (2003). General Microbiology Vol.II; Himalaya Publishing House.
2. Dubey R. C. and D. K. Maheshwari (2004). A Text book of microbiology, 1st Edition; S. Chand and Company Ltd.
3. H.C. Dube (2005) A Textbook of Fungi, Vikas Publishing House.
4. A Textbook of Fungi- Vashistha (2003) S. Chand and Company Ltd.
5. Davis and Harper, General Microbiology
6. Alexopoulos C. J. and C. W. Mims (1996). Introductory Mycology, 4th Edition; John Wiley and Sons, Inc, USA.
7. Stanier, R.Y., J.L. Ingraham, M.L. Wheelis and P.R. Painter (1987) 7th edition. General Microbiology, Macmillan Press Ltd.
