| Course offered to- BCA 2 <sup>nd</sup> year, B.Sc. (H) CS 2 <sup>nd</sup> year                                                                                                                                                                                                                 | Course Coordinator: Ms. Shivangi Ghildiyal                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                           |
| Course Overview                                                                                                                                                                                                                                                                                | This VAC(Value Added Course) is offered by the Faculty of Computer Applications. It has 8 modules to complete this course, upon completion you will be awarded a Certificate. In this value added course you will learn technologies like Python and ML algorithms. This course is for all the students studying in the Faculty of Computer Applications. The following are the details.                                                                                                                                                                                                            |                           |
| Course Prerequisites                                                                                                                                                                                                                                                                           | Interest to learn ,Laptop, Understanding of Basic Programming Concept of any language and Mathematics (Linear Algebra, Probability and statistics).                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                           |
| Objectives                                                                                                                                                                                                                                                                                     | <ul style="list-style-type: none"> <li>To setup the environment to run the python programs</li> <li>To Understand the essential concepts of Python programming</li> <li>To understand concepts about Data Types and Looping statements</li> <li>To learn the fundamentals of Machine Learning.</li> <li>To understand basic component of an intelligence system.</li> <li>To explore applications of machine learning.</li> <li>To understand different types of machine learning algorithms and tools.</li> <li>To learn how to use machine learning model to solve real world problem.</li> </ul> |                           |

### CIRCULAR

#### VALUE ADDED COURSE (Machine Learning with Python)- BCA , B.Sc.(H)CS

Students of BCA and B.Sc.(H) CS 2<sup>nd</sup> year are hereby informed that value added course "Machine Learning with Python" is scheduled from 7<sup>th</sup> February 2022 in your respective classroom, Academic Block-III.

#### Schedule:

- Time Slot: 03:00 PM to 05:00 PM
- Key Speaker: Ms.Shivangi Ghildiyal
- Duration: 2 hrs

#### Program Overview:

The objective of this course is to develop python skills of students who are ready to deal with complexities in the computing world and are able to maintain machine learning skills as per the requirement.

Head  
Department of Computer Applications  
Faculty of Computer Applications  
Invertis University, Bareilly (UP)

Mr. Jitendra Choudhary

# MACHINE LEARNING WITH PYTHON

Organised By:

**FACULTY OF  
COMPUTER APPLICATIONS**

*HOD:*

Mr. Jitendra Choudhary

*Speaker:*

Ms. Shivangi Ghildiyal

**DATE**

7 Feb - 7 March 2022

**TIME**

03 PM TO 05 PM

  
Department of Computer Applications  
Faculty of Computer Applications  
Invertis University, Bareilly (UP)

  
Registrar  
Invertis University  
Bareilly

  
Dean Academics  
Faculty of Computer Applications  
Invertis University, Bareilly (UP)

# COURSE OVERVIEW

This course's goal is to teach you machine learning ML algorithms and how to utilise them with scikit-learn, pandas, and other Python tools. Graphs and plots can be made using the Matplotlib library to visualise real-world data.
