Academic Administrative Audit Committee

Following Committee is formed to evaluate the Academic Administrative Audit for year 2021-2022:

1. Prof. P. P. Singh	Director IQAC & Dean (Sci.)	Chairman
2. Prof. R. K. Shukla	Dean (Eng.)	Member
3. Prof. Manish Gupta	Dean (Mgt.)	Member
4. Dr. Avadhesh Sharma	IQAC Coordinator	Member Secretary

The above committee members will audit the data obtained from the various departments in the attached format. The committee may visit the departments for physical verification of the claims made.

Academic Administrative Audit Committee Report

The Academic Administrative Audit Committee meeting was held in the office of the Director, IQAC at 03:00 PM on 01st June 2022. The following members were present in the meeting;

1. Prof. P. P. Singh	Director IQAC & Dean (Sci.)	Chairman
2. Prof. R. K. Shukla	Dean (Eng.)	Member
3. Prof. Manish Gupta	Dean (Mgt.)	Member
4. Dr. Avadhesh Sharma	IQAC Coordinator	Member Secretary

The committee members scrutinized the data submitted by the various departments and discuss the performance of each and every department. The committee concluded the following points;

Department	Progress	Comments
Applied Science and Humanities	Satisfactory	The department has the potential to increase the number of publications. They are suggested to increase the number of publications. The achievements of the students are impressive. Overall the department's performance is satisfactory
Fashion Designing	Satisfactory	They are suggested to increase the number of publications. Overall the department's performance is satisfactory
Biotechnology	Satisfactory	The department has a good number of publications. The events organized by the department are useful for the exposure of the students. The students do well in the competitive exams however, the achievements of students need to be improved.

Management (BBA, B.Com.)	Satisfactory	Events are organized by the department on regular basis. They are suggested to increase the number of publications. Overall the department's performance is satisfactory
Agriculture	Satisfactory	The number of guest lectures and student achievements is very few in number. The department has the potential to do more. There is a need to focus on quality publications.
Computer Applications	Satisfactory	They are suggested to increase the number of publications. Overall the department's performance is satisfactory
Electrical & Electronics Engineering	Satisfactory	They are suggested to increase the number of publications. Overall the department's performance is satisfactory.
Civil Engineering	Satisfactory	The number of guest lectures and student achievements is very few in number. The department has the potential to do more. There is a need to focus on quality publications.
Journalism and Mass Communication	Satisfactory	They are suggested to increase the number of publications. Overall the department's performance is satisfactory
Computer Science & Engineering	Satisfactory	The department has a good number of publications. The events organized by the department are useful for the exposure of the students. The students do well in the competitive exams however, the achievements of students need to be improved.
Mechanical Engineering	Satisfactory	The department is involved in the active research and has research projects from DST, India. The publications are good in number. The achievements of students need to be improved.
Education	Satisfactory	They are suggested to increase the number of publications. Overall the department's performance is satisfactory.

Pharmacy	Satisfactory	The number of guest lectures and student achievements is very few in number. The department has the potential in R & D. There is a need to focus on quality publications.
MBA	Satisfactory	Department is suggested to increase the number of quality publications. Overall the department's performance is satisfactory

Academic Administrative Audit Committee Recommendation

The committee members reviewed the data submitted by the various departments and based on the observations suggested the following measures for the overall improvement of the University.

1. The Departments like Biotechnology, Mechanical, CS & E, Computer Applications and Applied Sciences has the potential to do well in the field of research and innovation. These departments should explore the facilities available in campus for promotion of research and innovation activities.
2. The departments like Agriculture, Pharmacy, Education and Fashion Designing should focus more on Information and communication technology (ICT) tools during lectures. They may use interactive panels, projectors and software related to their course curriculum.
3. Each department on an average organized a mega event in the form of workshops or conferences during the year. The events organized especially conferences and workshops should be organized in collaboration with professional bodies and funding should be applied to various funding bodies.
4. The involvement of the students in events of other institutions like conferences/workshops should be increased for the exposure of the students. This will motivate the students to compete at state and national level for awards and recognitions.
5. The life memberships of the professional bodies are very less in number. The faculty members may be promoted to join life memberships of the Professional Bodies for establishing fruitful collaborations in R & D.
6. The final semester students of almost every department got an opportunity to work in industry or institute for practical exposure. It is a good initiative however, the students may also be recommended for short term training during semester breaks to enhance their exposure in the relevant field.

7. It is suggested that the university should take initiative to promote skill and entrepreneurship development among students especially of professional courses to nurture their talent by enlightening them on various aspects of industrial/business activity required for start-ups.

The above recommendations/suggestions by the committee members may please be placed in the next IQAC meeting for discussion and incorporation of the same in the curriculum of the university.

Department of Applied Science and Humanities (Faculty of Science) organized a guest lecture on the topic of – “Vedic Mathematics, Its uses and applications” on 29/09/2021 at 11:15 am to 12:15 pm in virtual classroom. Dr. V.K Gupta (Professor and Head Ramanujan Research Centre of mathematics, Ujjain, MP) was the respected speaker for the above topic.

After brief introduction in the presence of Dean (Prof. P.P Singh) and HOD (Dr. Kamlesh K Dubey) we started the session. Dr. V.K Gupta shared his experiences with us during lecture and also explains the application of Vedic maths. In this way sir had given us valuable knowledge about how to deal with large calculations. The Programme was attended by Dr. Kuldeep Chauhan, Mr. Arun Kaushik and 24 students of class B.Sc (H) first year and 35 students of class B.Sc (PCM) first year.

Report of guest lecture held on 23/11/2021 by Department of Applied Sciences and Humanities

Department of Applied Science and Humanities (Faculty of Science) organized a guest lecture on the topic of – “**Untold story of nano carbon**” on 23/11/2021 at 10:00 am to 12:00 pm in virtual classroom. **Professor Sabyasachi Sarkar** (Former Professor and Head OF THE Department Kanpur IIT and Currently honorary professor Indian Institute of Engineering Science and Technology (IEST) Shibpur, West Bengal) was the respected speaker for the above mentioned topic.

After brief introduction in the presence of Dean (Prof. P.P Singh) and HOD (Dr. Kamlesh K Dubey) we started the session. Professor Sabyasachi Sarkar shared his experiences with us during lecture and explained the source of nano carbons from easily available raw material and its application for various purposes including drug delivery. In this way students are introduced to the fascinating field of nanocarbon. The Programme was attended by Dr. Rakhi Majumdar, Dr. Kuldeep Chauhan, Dr. Nisha Mehra, Dr. Krishna Ji, Dr. Lalit Kumar, Dr. D. Arumugam, Dr. Ashuthosh Pradhan, and 37 students of class B.Sc (H) first year, B.Sc (PCM) 1st year 39 students, B.Sc (PCM) 2nd year 14 students, B.Sc (PCM) 3rd year 15 students, B.Sc(H) Chemistry 3rd year 5 students, B.Sc(H) 2nd year Chemistry 2nd year 27, M.Sc (Chemistry) 1st year 7 students, M.Sc (Physics) 1st Sem, M.Sc (Physics) 2nd year 4 students, M.Sc(Maths) 2nd year 4 students, M.Sc (Chemistry) 2nd years 10 students.

(Event S.No. 3)

Report on the guest lecture (Life Science)

An online guest lecture was organized by the Department of Applied Sciences and Humanities on 25th Nov. 2021. **Dr. Pulak Das** from School of Human Ecology Ambedkar University Delhi, delivered the lecture on the topic “**Remote sensing and its application in vegetation studies**”. **Dr. Satendra Singh** inaugurate the session and invited the Head of the Department **Dr. Kamlesh K. Dubey** to introduce the guest lecturer. The information presented by **Dr. Pulak Das** was based on the application of remote sensing in vegetation, climate change and its future prospection in research.

Remote sensing provides the satellite/aerial imagery images with the help of sensing equipments that help in evaluating the data using Geographical Information Systems (GIS approaches). The presentation showed the significance of remote sensing in predicting future phenomenon, map rendering and quantitative and qualitative estimation and investigation of forests and vegetation. In collaboration with electromagnetic radiations received from visible and infra-red rays and mathematic operations, vegetation indices are prepared that support the results by providing data on topology, percentage cover, vegetation type, future increase or decrease in forest cover, crop yield etc. In addition, the lecturer shared the use of remote sensing in disaster management. He also described the working model of remote sensing and encouraged the students to pursue their career in the field. It was also come to know that such approaches may be utilized in several disturbance that have occurred in the environment and their chances to occur in the nearer future. Remote sensing and GIS together appear as a rising powerful tool for environmental protection and its sustainable management.

Overall, c. 70 students from B.Sc. (ZBC/PCM) participated in the lecture with the faculty of life sciences, maths, physics and chemistry. The lecture was c. 1.30 hr (1.30-3 pm) long and in the last few minute the queries of the students were answered by the invited speaker.

The session was closed by the conclusion and summary of the content provided by **Dr. Santosh Joshi**.

ABOUT THE CONFERENCE

It is a matter of immense pleasure that the Faculty of Science, Invertis University Bareilly, is organizing an Online 6th International Conference on "Recent Advances in Science" on 01st - 02nd April, 2022 (ICRAS-2022). The conference intends to give a platform to Young Students, Faculties, Scientists and Industrial Professionals to share their research and findings, and also to build a stronger network in the direction of scientific advancement.

We would like to invite Research Papers based on original research work from researchers, academicians, corporate leaders and students to gather and discuss the latest changes in the field of science. The objective of this international e-conference is to facilitate the sharing of research based knowledge and promote the innovative work for betterment of society.

INVITED SPEAKERS

Report of Chemistry Lectures in ICRAS 2022

Report of Invited lecture by Professor Rama Pati Tripathi in the 1st technical session(chemistry) of ICRAS 2022

Department of Applied Science and Humanities (Faculty of Science), Invertis University has organized 6th international e-Conference on 'Recent Advances in Science' on April-2,2022. Professor Rama Pati Tripathi (Adjunct Professor, NIPER Raibareilly, Former Dean of NIPER Raibareilly, Former Principal Scientist of CDRI, Lucknow) was the 1st invited speaker for the 1st technical session of Chemistry (at Room T2), ICRAS 2022. The topic of his lecture was 'Engineering with sugars/non-sugars for new chemotherapeutics'. In his lecture, Professor Tripathi explained how the simple sugar molecules can be converted to new therapeutics to treat different infectious and metabolic disorders. During his lecture, more than 50 persons were connected via online which includes delegates, students and research scholars. The session was conducted from 2:15 pm to 3:00pm on April 1, 2022. All the faculty members of the department of Chemistry, ASH were physically present at Room T2 during the lecture.

Dr. Neetika

The title: Fabrication and Characterization of MoS₂ Based Devices.

The talk was divided into two parts. Firstly, MoS₂ has been characterized using XRD and Raman spectroscopic data. Binding energies have been found from the XPS spectrum.

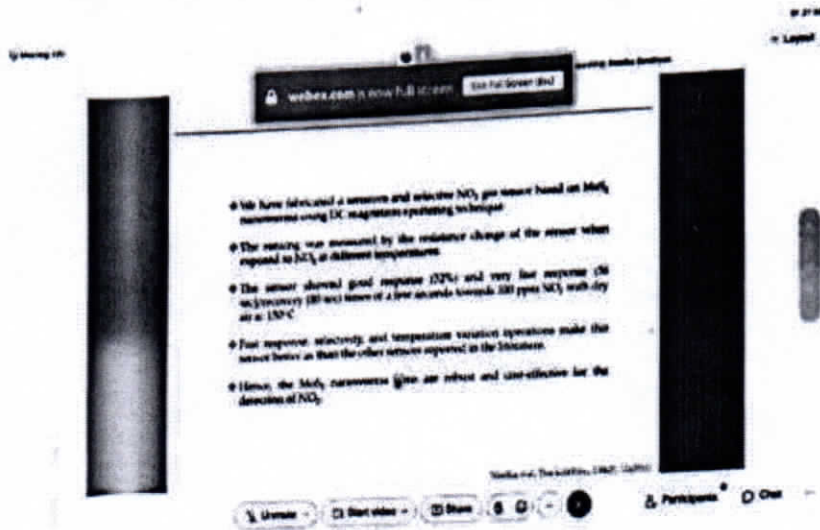

MoS₂ being a semiconductor, it has been shown that a junction with 5 nm thick MoS₂ layer exhibits rectifying behaviour typical of a metal-semiconductor Schottky junction. But the thermionic theory fails to explain the observed temperature dependent electrical properties of the Schottky junction. This type of non-ideal behaviour of the Schottky junction has further been confirmed by the high value of

the series resistance and the Richardson plot.

In the next part of her presentation, Dr. Neetika discussed the fabrication of a NO_2 gas sensor using MoS_2 nanoworms by DC magnetron sputtering technique. The fast response, selectivity and the temperature variant operations show that this type of sensors are better than the existing sensor devices for the simple fact that they are robust and cost-effective for the detection of NO_2 .

The Title: Hybrid Supercapacitors: Fundamentals to Fabrication

In the introductory part of the talk, several crises such as large scale climate change due to global warming or a nuclear warfare etc that the modern society may face has been discussed briefly. The energy crisis is one of the most important of such crises. The move towards the renewable sources of energy such as solar energy, wind power

Renewable Energy Resources

The energy resources which can be used to produce again and again are known as renewable energy resources.

These are resources found in nature that are self-regenerating
— Sunlight, geothermal, heat, tides, wind, biomass.

These sources are normally used to produce clean (or green) energy

This production does not lead to climate change and does not involve emission of pollutants.

A related term is sustainable energy:
This concept refers to generating energy with an awareness of the future, i.e. in a way that would enable future generations to meet their energy needs too.

or hydropower etc is the need of the hour. But to use these renewable sources of energies efficiently, we need powerful and efficient storage devices. For this purpose both a battery and a capacitor can be used. After pointing out their relative merits, it has been stressed that a special form of capacitors, namely, supercapacitors would be extremely useful in such purposes.

COMPARISON

Batteries	Capacitors
• High energy density	• High power density
• Limited cycle life	• Long cycle life
• Long charging time	• Short charging time
• Voltage and current limitations	• High load currents
• Highly temperature sensitive	• Excellent temperature performance

After this introductory part, the different methods of fabricating a supercapacitor have been discussed. It has been shown that the supercapacitors can be fabricated using amla leaves but for higher output power we need metal-oxides as fabricants. As for the applications of such supercapacitors in our modern society, Shanghai based electric buses that are run by the super-capacitors has been discussed.

Fabrication of $ZnCo_2O_4$ based symmetric supercapacitor using gel-electrolyte

The working electrodes were prepared via mixing the electroactive materials (80 wt %), carbon black (10 wt %) and a polymer binder (polyvinylidene fluoride, PVDF, 10 wt %).

Then the slurry was spread using drop casting on a piece of nickel mesh as a current collector and was dried at 120 °C for 12 h in an oven.

The symmetric SC (SSC) device was assembled with gel-electrolyte (PVA/KOH), which also works as a dielectric separator.

Academic Audit Report for Session: 2021-22

1. Departmental Goals (min. five points)

- (i) Register for at-least one patent.
- (ii) At-least one research paper (SCOPUS or SCI) must be published by each of the faculty members of the department and also motivate students to do so.
- (iii) At least one research proposal will be submitted to the funding agencies in the academic session 2021-2022.
- (iv) Securing paid internship opportunities or internship at the known organisations to the interested students with the help of CRC and at the department level also.
- (v) Arrange special classes to interested students preparing for GATE, SSC JE, and other relevant engineering competitive exams.
- (vi) Modify the curriculum as the demand of the industries, competition and also include the subjects to improve the human values and engineering ethics.
- (vii) All the faculty members are Ph. D., if not motivate faculties to register for Ph. D.
- (viii) 20% to 25% of the syllabus will be covered through online mode (Technology Enabled Learning (TEL)) by the teachers, this semester onwards by using available tools like Google meet, Google classroom, Skype, Cisco, and virtual labs as provided by MHRD.
- (ix) Stabilize the size and improve the quality of the education in all courses of the department by identifying the weak students, also providing guest lectures from industry experts and Professors from IIT/NIT.
- (x) Conduct atleast one international conference and motivate students to send research papers in the same.
- (xi) Arrange the extra classes for the weak students to improve their results.
- (xii) Make efforts for the placement at the department level to improve the placement record.
