----- REVIEW 1 -----

PAPER: 102
TITLE: DNA SEQUENCING BY USING STRING MATCHING TECHNIQUES
AUTHORS: Sakshi Tripathi and Anil Pandey

----- OVERALL EVALUATION -----

According to the author it is not mentioned clearly whether LCS (Longest Common Substring), Longest Common Subsequence or Robin Karp algorithm is better. Although, Performance and Accuracy of both the algorithm is not calculated. Also the working implementation of Longest Common Subsequence is not well documented. To prove the above the algorithm more explanation is required. After doing above modifications paper may be accepted.
